

CS 6460 - Final Project Catalog

Keith Adams

kadams62

Instructions

1. Open the file at `/cs6460_site/index.html` in your browser. Tested in latest versions of Safari, Chrome, and Firefox.
2. The Home page contains the final version of my project, but you'll find other demos in the Menu.

Catalog

- `/assets/`
 - These files were created by the developer of the Metronic theme. I used a website template for the styling of my pages.
- `/cs6460/`
 - All of the files in this directory are my work except the following:
 - `bm25.js`: Natural Language Processing algorithm. Source in file.
 - `Rectangle.js`: the rectangle comparison method is not entirely my code. Source in file. The rest of the code is mine.
 - `*.html`: parts of these files are coded by the Metronic template. I wrote the code inside the `page-content` divs.
